EDUCATION

B.Tech in Computer Science - Artificial Intelligence
Banasthali Vidyapith
XII CBSE | The Jain World School

2024-28
CGPA: 7.88/10
85.2%

PROJECTS

MeetOn - Real Time video Conferencing App

Tech Stack: MERN Stack, Socket.IO, WebRTC, GitHub + Render [link](#) [github](#)

- Engineered a low-latency video conferencing platform using WebRTC Mesh architecture, enabling seamless peer-to-peer audio/video streaming for multi-user rooms.
- Leveraged the Navigator API and MediaDevices interface to securely manage hardware permissions and capture high-quality real-time media streams directly from the browser.
- Orchestrated a real-time signaling server with Node.js and Socket.IO to manage bidirectional communication, reducing connection handshake time and supporting instant room joining.
- Developed a robust RESTful API with Express.js and secure token-based authentication to handle user sessions, profile management, and persistent meeting history stored in MongoDB Atlas.
- Deployed a scalable microservices architecture on Render, optimizing the frontend (React) and backend (Node.js) for cross-origin resource sharing (CORS) and mobile responsiveness.

TECHNICAL SKILLS AND INTERESTS

- **Languages:** Java, Python, JavaScript, SQL
- **Frameworks & Systems:** React, Node.js, Express.js
- **Tools & Operations:** Git, GitHub, Hoppscotch/Postman, Render
- **Databases:** MongoDB, MySQL
- **Relevant Coursework:** Object Oriented Programming, Database Management System, Data Structures and Algorithms

ACHIEVEMENTS

- 2nd Runner Up, NexHack 1.0: Secured a podium finish in the hackathon organized by IITM, Janakpuri, New Delhi.
- Top 50 Finalist, Smart India Hackathon (Internal): Ranked among the top 20% of 250+ teams in the internal qualifiers for the Smart India Hackathon.
- Earned Gold Badge (5 Stars) in Java on HackerRank, ranking in the top percentile for proficiency in Data Structures, Algorithms, and Object-Oriented Programming (OOP).
